Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 6, 10-16, 19 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by U.S. Patent No. 6,064,653 to Farris.

As per claims 1-4, 16, 19, Farris discloses the limitations of these claims (see figs. 3 and 6).

As per claims 6, 10-15, Farris supports this limitations also (fig. 4)..

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5, 7, 20 and 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Farris as applied to claim 1-4 above, and further in view of the examiner taking official notice.

As per claim 5 and 7, Farris does not specifically disclose these features. The examiner, however takes official notice that it is well known in the art of communications as this to use a wireless connection where one or more clients can simultaneously access the internet. It would

have been obvious to anyone having an ordinary level of skill in the art at the time the invention was made to have modified the system of Farris to include the wireless features of applicant's invention since remote laptop computer systems used this technology constantly to connect and communication to the Internet.

As per claim 20, the examiner takes further official notice that this technique of establishing a secure communication channel is well known in the art of secure data.

As per claim 24, the examiner also takes official notice the feature here is well known since many systems require multiple communication attempts to ensure that the clients in the loop possess the authority to acquire data and not just a hacker.

Allowable Subject Matter

Claims 8, 9, 17, 18, 21-23, 25-27 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
